

Game Changing!

Feeder Technology

Orbetron has **4 sizes of Micro Feeders**

50, 100, 150, 200 with feeding rates from 1 gram/hour to 800 lbs./hour

No matter if you run a 3/4" - 10" extruder or 20 ton a 3000 ton IMM **Orbetron has a feeder for you.**

- Offer both **volumetric and gravimetric controls.**
- Single or multi-component units
- Better repeatability and capabilities that the others can't offer.
- Integrate into 3rd party blenders for greater accuracy

Can your feeder feed 1 gram/hour?

Can your feeder feed 1, 2, 3, or 4, pellets at a time?

Can your feeder feed powder, pellets, flake, and granulate in the same feeder?

Can you exchange material in 15 sec.

Can your feeder handle short batch cycles?

Can your feeder integrate into your current material hopper?

Orbetron can!

- Tired of that big bulky batch blender or single additive feeder on top of your small IMM or Extruder
- Tired of the static issues during mixing
- Tired of your additive migrating to the edges of the mixer
- Looking to reduce material usage
- Tired of inconsistent color runs
- Want better control or BA or translucent color requirements
- Want a feeder built for your process
