

Orbetron's partnership with Mahr Metering has empowered for expansion in the Liquid Feeding Product line, which is built with precision, durability, and accuracy.

Description

Orbetron's Liquid Meter Mix and Dispense Systems are designed for on-demand requirements moving directly to the production line. These systems can be used with multi-component chemistries and are highly accurate. With complete automation, the system has alarm monitors for high temperature, high pressure, off ratio, and level controls for the day holding tanks.

Orbetron's product line doesn't stop there, visit www.orbetron.com to learn more about Orbetron's Liquid Feeding Technology and all that the product line offers.

Specifications

- Mobile systems with small foot print
- Turn-key systems from product storage to delivery point
- Closed-loop communication
- Communication between liquid system and existing production equipment
- Design of multi-sized liquid tanks, optional: heated
- Low maintenance and operator-friendly touch screen
- Easy unloading using drum pumps
- Heated systems
- Multiple discharge heads available
- Loss-in-weight and flow meter options

2-Part Mix Head

Low And High Viscosity Drum Metering Pumps

12 Stream Single Component Dispensing System
